After eye contact: Moderate to strong irritation of the eyes (redness, swelling, burning, watering eyes).

After Ingestion: Ingestion may cause pain, burning, swelling and redness in the mouth and throat. Nausea and vomiting may occur.

**4.3. Indication of any immediate medical attention and special treatment needed**

After inhalation: Inhalation may cause hyperacidity of the organism with following shortness of breath.

After eye contact: No special action.

After ingestion: In case of coughing or shortness of breath immediately call the rescue services.

After skin contact: If irritation persists, seek medical advice.

**SECTION 5: Firefighting measures**

**5.1. Extinguishing media**

Suitable extinguishing media:

Attention: general dust limit value 6 mg/m<sup>3</sup> (fine dust concentration)

**8.2. Exposure controls**

Respiratory protection:  
Not needed.

Hand protection:

For the contact with product protective gloves made from Spezial-Nitril (material thickness > 0.1 mm, break through time > 480 min class 6) are recommended according to EN 374. In the case of longer and repeated contact please note that in practice the penetration times may be considerably shorter than those determined according to EN 374. The protective gloves must always be checked for their suitability for use at the specific workplace (e.g. mechanical and thermal stress, antistatic effects, etc.). The gloves must be replaced immediately at the first signs of wear and tear. We recommend to change single-use protective gloves periodical and a hand care plan in cooperation with a glove manufacturer and the trade association in accordance with the local operating conditions.

Eye protection:  
Wear tight fitting goggles.

Skin protection:  
Protective clothing against chemicals. Observe manufacturer's instructions.
