### Only relevant for professional/industrial use

### 8.1. Control parameters

Valid for

Great Britain

Contains no components with occupational exposure limit values. Attention: general dust limit value 6 mg/m3 (fine dust concentration)

#### 8.2. Exposure controls

#### Respiratory protection:

If dust is produced wear P2 mask.

#### Hand protection:

For the contact with product protective gloves made from Spezial-Nitril (material thickness > 0.1 mm, break through time > 480 min class 6) are recommended according to EN 374. In the case of longer and repeated contact please note that in practice the penetration times may be considerably shorter than those determined according to EN 374. The protective gloves must always be checked for their suitability for use at the specific workplace (e.g. mechanical and thermal stress, antistatic effects, etc.). The gloves must be replaced immediately at the first signs of wear and tear. We recommend to change single-use protective gloves periodical and a hand care plan in cooperation with a glove manufacturer and the trade association in accordance with the local operating conditions.

#### Eye protection:

Wear tight fitting goggles.

#### Skin protection:

Protective clothing against chemicals. Observe manufacturer's instructions.
